

MANAGED FUND

Morningstar Multi-Asset Real Return Fund

A multi-asset investment solution that is actively managed on your behalf. Our team aims to grow your wealth steadily whilst looking to maximise return for risk – investing when, and where, it makes sense to do so.

This Fund is designed for Australian investors who:

- ✓ Are seeking a defined rate of return above inflation (as measured by CPI) and are willing to compound their investment for at least 7 years.
- ✓ Are looking to grow their wealth to meet their long-term goals and are not sensitive to large short-term swings in their account balance.
- ✓ Want to access a professionally managed investment fund that is well diversified across growth assets (such as shares and property) and defensive assets (such as bonds and cash) from around the world.

Key facts

APIR	INT0040AU	Suggested investment timeframe	7+ years
Performance objective	CPI + 4.0% p.a.	Fees (including GST):	
		Management Fees and Costs	0.72% p.a.
Invested in	Shares, exchange traded funds, managed funds, property, infrastructure, bonds and cash.	Performance Fees	0.10% p.a.
		Transaction costs	0.07% p.a.

Why Invest in this Fund?

To outpace the rising cost of living by targeting an investment return that is set at a defined amount above inflation.

To achieve smoother investment returns by investing in a fund that is actively positioned for changing market conditions.

Take comfort that your money is being invested in the most compelling investment opportunities around the world.

Direct

Initial investment	\$10,000	Distribution frequency	Quarterly

We work with your adviser to help you achieve your goals, such as:

Buying/upgrading a property

Achieving financial security

Saving for retirement

Investing a lump sum

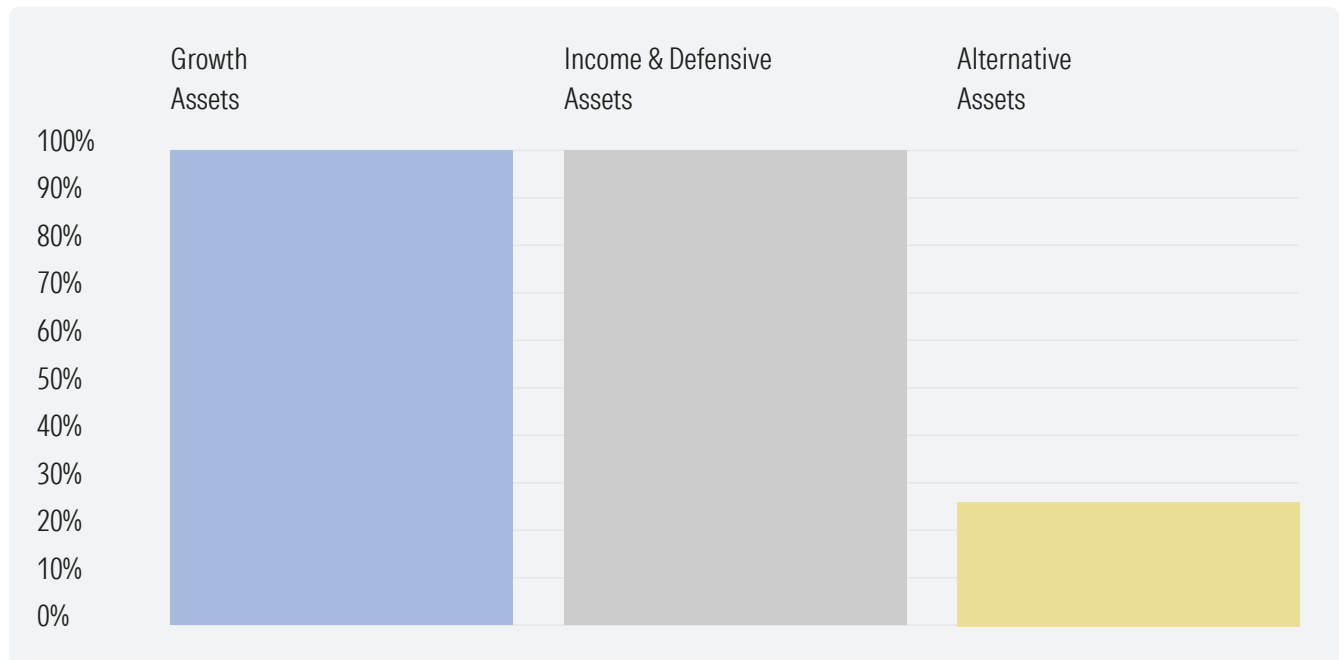

Planning for the future

What are you invested in?

The Fund invests across a range of asset classes such as shares, property, infrastructure, bonds and cash. We do this using a combination of tools, including individual securities, exchange traded funds and managed funds.

Investing when, and where, it makes sense to do so. Asset allocation ranges refer to the minimum and maximum asset mix of the portfolio aimed to meet its long-term objectives.

*Alternatives are diversifying assets whose return profile differs from that of traditional asset classes such as shares and bonds.

The above illustrates typical asset allocation ranges for each asset class. Actual allocations may vary within these ranges.

How is the Fund managed?

There are three key things we keep in mind when we invest your money.

Value

The potential for return is greater and loss is lower over the long term if you purchase investments that are currently overlooked or under appreciated by other investors...

Reward for Risk

Our goal is to find investment opportunities that reward investors for the risk they take and avoid investing in assets if the reward isn't worth the risk. In other words, we are happy to deviate from our long-term asset allocation instead of investing in overvalued assets.

True Diversification

You're less exposed to the risks of investing when your money is spread across a mix of different investments (like shares, property, bonds and cash) that complement each other. In other words, simply holding more of the same/similar thing isn't the same as true diversification.

Who is Morningstar Investment Management?

Morningstar Investment Management Australia Limited is a subsidiary of Morningstar, Inc., a leading provider of independent investment insights in North America, Europe, Australia and Asia. Morningstar, Inc.'s investment advisory subsidiaries provide discretionary investment management and advisory services.
