Morningstar Aggressive (80) Managed Account Portfolio

Performance Update | As of 31/10/2026

Risk Level: High
Inception: 1 December 2017
Investment Horizon: 8 Years

Management Fee: 0.60%
Indirect Costs: 0.12%

Investment Objective: To achieve capital growth through investing in a diversified portfolio of growth and defensive asset classes, with a greater emphasis on growth asset classes.

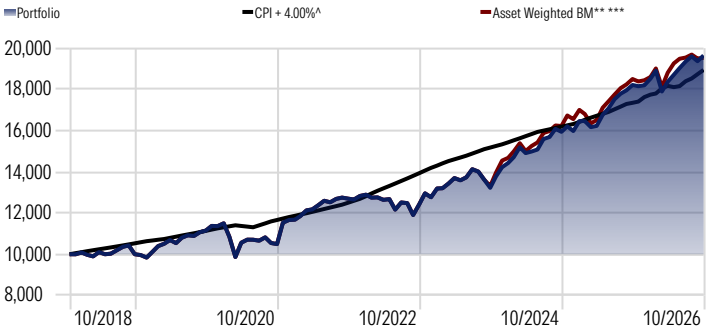

Performance Objective: To deliver outperformance of the asset weighted benchmark and additionally to aim to earn a rate of return that exceeds inflation by at least 4% per annum both over rolling 8-year periods before fees.

Investment Strategy
An actively managed diversified portfolio of securities across both growth asset classes such as Australian equities, property and global securities, and defensive asset classes such as cash and fixed interest securities. In general, the portfolio's long-term average exposure will be around 80% growth assets and around 20% defensive assets; however the allocations will be actively managed within the allowable ranges depending on market conditions.

*Investment performance represents modelled performance only and assumes all income distributions received are reinvested back into the portfolio. This does not imply participation in issuer dividend reinvestment plans (DRPs), and actual reinvestment outcomes will vary between investors. Investment returns are calculated before tax and after management fees which are inclusive of GST. An individual investor's performance will differ from the modelled performance due to factors such as transaction timing, actual management fees, cash flows, whether income is distributed or reinvested, and any divergence from model portfolio weightings or holdings. In certain circumstances, a specific platform may not make a model security, fund or investment manager that is selected by our investment managers, available for investment. Where this occurs, a substitute investment may be used, which may result in differences in portfolio holdings, risk characteristics and investment performance relative to the model portfolio. The portfolio may include Funds (including Exchange Traded Funds) which charge management fees and these fees are an additional cost (captured within the indirect costs) to individual investors and impact their return.
**Prior to 1 October 2023, the portfolios were managed to a CPI benchmark only. The performance of the Asset Weighted Benchmark will be displayed from 1 October 2023.
***Effective 1 November 25, the constituent benchmarks used in the construction of the Portfolio's composite benchmark are provided by Morningstar, Inc. Historical benchmark returns up to 1 November 25 will remain unchanged. Morningstar, Inc. operates Morningstar Indexes, which is a separate business unit to Morningstar Investment Management. Morningstar Investment Management is not involved in the construction, methodology, or maintenance of Morningstar Indexes.
^The CPI was not available for the current month at the time of creation of this report. CPI for the previous month has been used as a proxy for the current month. Please note the actual CPI for the current month may differ to the proxy used.

MORNINGSTAR

Investment Principles

Our search for quality & value never ends.

Our three investment principles inform every investment decision we make.

01

We champion investors.

We believe that if investors win, we all win.

We are independent minded which allows us to make investment decisions with the focus on helping investors meet their financial goals.

Investment decisions are made with the end investor in mind.

02

We take a fundamental approach.

We believe that fundamental factors, such as the quality of personnel and an investment's future earnings will drive results.

Powerful analytics and models are behind our research and portfolios, giving us the confidence to take a long-term perspective.

We stand firm behind our investment views, even if they are unpopular. This means being willing to ride out market volatility.

03

We believe that price matters.

We anchor on an investment's underlying intrinsic value rather than fleeting news, sentiment or momentum.

Focusing on the difference between price and intrinsic value enables investors to get more than they're paying for.

We also believe controlling costs helps investors build wealth by letting them keep more of what they earn.
